

CREATE-A-CHECK DECOMMISSION

Frequently Asked Questions

What is Create-a-Check?

Create-a-Check is a product that allows AvidXchange customers to print their accounts payable checks locally, while also serving as an integration to the AvidPay Network.

What is happening?

As we continue to innovate processes and technology within the AvidPay Network, we will be upgrading the Create-a-Check integration to an improved, cloud-based platform, Print-to-Avid, which will include heightened security measures and new functionality.

With these enhancements, we will no longer be renewing any agreements, licenses, or related support for Create-a-Check beyond its current expiration date.

How does this impact my organization?

As AvidXchange continues to invest in innovating the AvidPay Network, we will no longer renew any agreements, licenses, or related maintenance support for Create-a-Check MICR check printing beyond your contract's current expiration date.

Why is AvidXchange discontinuing the Create-a-Check product?

We made the decision to end support for Create-a-Check due to changes in technology and diminishing market demand, as well as to focus our efforts on automation and ERP systems embedding check printing as a native functionality.

When will AvidXchange cease supporting my organization's use of Create-a-Check?

AvidXchange will no longer support Create-a-Check beyond your contract's current expiration date.
