[Click on this link to access Capture release notes.](#)

## TIMBERSCAN NEW FEATURES

There are no new features in this release.

## RESOLVED ISSUES

T300-851 When coding an invoice, enter or change pre-tax value in a distribution line, route manually, and save. The pre-tax amount in distribution changes to total of line item.

T300-898 Creating a report by grouping cost code is not working correctly.

There is also an issue with the export to Excel. If the child grouping is not expanded by using the expand all button, the child grouping data does not export.

## AIM

No changes were made to **AIM** in this release.

## CAPTURE

No changes were made to **Capture** in this release.
